

Geography

Aim: to be able to make maps and plans, of real and imaginary places.

Create a map of your home/building complex. Attach a key and include both, man made and natural features, of your local environment (swimming pool, pond, park, road, trees, living room, kitchen...)

International

Aim: to be able to respect one another's individuality and independence.

Make a fact file of a town, city or village, of your choice. This could be yours (or your parents) home town. Include drawings, photographs and texts, to describe the area.

Complete activities and bring your work into class, to share and display.

Science

Aim: to understand that different locations support different living things.

Research an animal, that is found here in Vietnam. Can you describe, using drawings and text, the kind of habitat that this animal lives in.

Given your findings, can you think of anywhere else in the world, that this animal could live, and explain why?

Technology

Aim: to be able to design what they are going to make.

Now that we are in wet season, most days we are having spells of heavy rain. Can you design a Year 1 Garden Area, where we could safely house our Science work, planting tools and overalls, while also considering outdoor space for our plants. Where, in our school grounds, would you like your garden to be?

Art

Aim: to use a variety of materials and processes.

Find and study, a tree in your local area. Concentrating on the colours, texture and shape, create a tree collage, using coloured paper, paint, pencils and leaves.
